

MORA GARDEN - Frost-proof garden valve

Our garden valves are self-draining and therefore frost-proof even if you forget to dismantle the garden hose before the season with degrees below zero. However, we recommended that you always remove the hose and coupling when there is a risk of low temperatures.

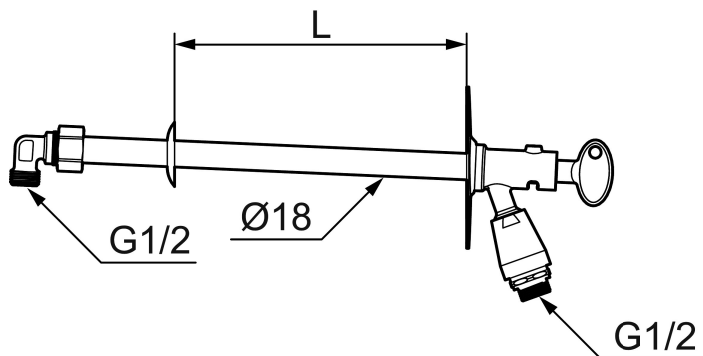

Article number: 461760

Description: For wall thickness max. 1000 mm

Uniqe characteristics

Backflow protection unit type 

- Self-draining
- Key included
- With approved non-return valve
- Can be cut to suit wall thickness
- Wall bracket: H=110 mm, W=60 mm
- Approved backflow prevention device, EN-Standard EN 1717
